# EcoNATDPI Release Notes

Release notes for 3.1.2.0.18 version.

Release date November 30 2017.

**Added**

The command **firmware unlock** is added. Which reset the blocked process of updating the firmware. The process will be blocked in case of an unexpected communication failure between EcoNAT and the server with the firmware file.

**Fixed**

URL filtering. In the URL filtering logic, a critical error leading to a software crash has been fixed.
