

EcoNAT

Release Notes

Release notes for 3.1.3.2.5 version.

Release date April 17 2018.

Added

URL filtering. Added the ability to block all ports - BlockType IP.

URL filtering. Increased the size of the firewall-table URL-filtering.

BRAS. Added the ability to specify special characters in redirect_url for EcoBRAS services.

BRAS. The acl field is returned to the BRAS configuration section.

BRAS. Fixed the logic of the EcoBRAS operation within the first 10 minutes after launch. During this period BRAS sessions are not started for customers who are under BRAS processing.

BRAS. Optimized memory freeing when adding and removing subscribers using the EcoBRAS protocol.

LOG. Fixed the formation of a package for sending logs using QoE, Clickstream functionality.

Removed

In the output of the show resources command has been removed:

- the counter registered for BRAS subscribers (Bras table),
 - DPI buffers (DPI host buffers, DPI path buffers, DPI state buffers).
-
