

EcoNAT

Release Notes

Release notes for 3.1.4.0.12 version.

Release date September 11 2019.

Added

RADIUS. The functionality **time based policing** has been added to shared contracts.

RADIUS. Parsing the contract number in the **username** field has been implemented.

Changed

BRAS. Statistics display changed: instead of recieved/transmitted, downstream/upstream is now everywhere used (the first number is downstream)

RADIUS. The indication of packets/bytes has been removed from **accounting start**.

RADIUS. Upon receipt of a CoA request, if the designated service does not change, do not send **accounting stop/start**.

RADIUS. When sending an **accounting start**, reset accumulated counters of transmitted packets/bytes to zero.

Fixed

URL filtering. The omissions of sites which immediately return a page without the **psh** flag to **tcp syn** was fixed.
