EcoNAT
Release Notes

Release notes for 3.1.4.0.29 version.

Release date November 25 2019.

Changed

Earlier in the **show license**, the "**DPI**" item denoted URL filtering (according to the list of Roskomnadzor or user lists). The URL filtering license information has now been renamed to "**URL filter**". And the "**DPI**" item in the show license displays the license information for multi-protocol DPI.

Fixed

Fixed a bug in the name of the configuration element **system/bypass/bypass_timeout** -> **system/bypass/bypass_interval**.

Fixed sending **http redirect / tcp rst** when working in a scheme with MPLS encapsulation or with a balancer.
