

EcoNAT

Release Notes

Release notes for 3.1.4.0.33 version.

Release date December 18 2019.

Changed

Improved bypass over UDP protocol.

The length of the Agent-Circuit-Id and Agent-Remote-Id fields from opt.82 (transmitted to the RADIUS Access-Request) has been increased to 26 bytes.

Fixed

If there is no IPv6 license, the **local_ip_v6** configuration items are not displayed in BRAS policies.
