

# EcoNAT

## Release Notes

Release notes for 3.1.4.0.36 version.

Release date January 10 2020.

### **Added**

Added JS Injection functionality.

For the IPv6 functionality the ability to run the **goto ipv6** command in the CLI is added.

### **Changed**

Improved log sending algorithms.

QoE messages are sent over UDP traffic only if packet/byte counting is enabled.

### **Fixed**

Fixed blocking of HTTPs resources opened by IP.

The work of the **show sessions** command has been fixed.

Work with IPv6 is fixed in the CLI (in particular, the ability to specify any is added).
