EcoNAT
Release Notes

Release notes for 3.1.4.0.38 version.

Release date January 28 2020.

Added

BRAS now handles the Delegated-IPv6-Prefix attribute in RADIUS Access-Accept packets for further authorization of users having IPv6 addresses with delegated prefix without sending Access-Request.

URL filtering. A timestamp display of the downloaded registry, as well as the last received delta package were added to the output of the **show dpistate** command.
