

EcoNAT

Release Notes

Release notes for 3.1.4.0.39 version.

Release date February 13 2020.

Added

BRAS BRAS. Added support for the [Class attribute](#) to the RADIUS module.
URL filtering. Support has been added for downloading the registry of prohibited resources from the server of the State Reserves Center.

Changed

Improved interaction between EcoBRAS and EcoDPI modules.

Fixed

URL filtering. **Behavior color** in dpilists was fixed.
BRAS. A critical bug which led to a crash in some cases when EcoBRAS was working with IPv6 traffic was fixed.
Fixed CLI sticking problem when it returns an error on any input.
