

EcoNAT

Release Notes

Release notes for 3.1.4.0.40 version.

Release date February 20 2020.

Changed

URL filtering. The **no_ip_remote** parameter of the dpilist has been moved to the configuration tree above, now it is located immediately after **no_ip**.

Improved CLI performance.

Fixed

URL filtering. The generation of HTTP redirects to sites opened by entering IPv6 addresses in the browser line has been fixed.

Fixed error processing the **any** value for IPv4 settings.
