

EcoNAT

Release Notes

Release notes for 3.1.4.0.42 version.

Release date March 11 2020.

Added

RADIUS. Added parameter **idle-monitor-direction**, which allows to specify the direction of traffic for updating the **idle-timeout** counter.

Changed

QOE. Reduced the size of packet/byte counters.

RADIUS. Now, after the **session-timeout** expires, an "accounting stop" is sent to RADIUS.

Fixed

RADIUS. Fixed subscriber reauthorization with IPv6 prefix delegated.

RADIUS. Fixed initialization of **idle-timeout** counter. Previously, it was used only from the second packet.

QOE. The calculation of packets/bytes and determination of the time of the first packet by session is fixed.

Fixed output of **clear sessions** command.

Fixed "on a stick" mode for 25G interfaces.

Fixed zeroing of interface counters when SNMP is enabled.
