

# EcoNAT

# Release Notes

Release notes for 3.1.4.0.43 version.

Release date March 30 2020.

## **Added**

RADIUS. Added settings for limiting the intensity of sending messages to the RADIUS server in the CLI.

## **Changed**

Improved interaction of DPI and BRAS modules.

## **Fixed**

DPI. Fixed module operation when using **dpilist** only for protocol recognition (without a loaded list of resources).
